Allied Mega Irrigation Drip Oil is manufactured with base oils that resist thinning out at high temperatures and excessive thickening at low temperatures. These base fluids have excellent demulsibility to repel water and prevent surface rust and corrosion.

This combination of superior additives and base stock provide a tenacious lubricant film, which resists throw-off in service.

All Allied products are formulated to meet, or exceed, all relevant industry standards. The chart below highlights the key protection and performance features and benefits provided by our Allied Mega Irrigation Drip Oil.

**FEATURES**

Utilizes base oils possessing good oiliness and spread ability characteristics

Provides a strong lubricant film to resist throw-off of parts

**BENEFITS**

- Resists high temperature thinning
- Resists excessive thickening at low temperatures
- Helps prevent surface rust and corrosion
- Superior lubrication and protection
- Outstanding shaft adhesion

To find out more about our products and services, contact us at: (402) 344-4343 or visit www.alliedoil.com
Allied Mega Irrigation Drip Oil is recommended for use in all turbine shaft drip applications where metal on metal wear is a problem and oil cling is important to protect equipment.

**Typical Properties:**
