General Description

All Allied products are formulated to meet, or exceed, all relevant industry standards. The chart below highlights the key protection and performance features and benefits provided by ALLIED SYNTAX MTF 7000 SYN Transmission Oil.

Overview

ALLIED SYNTAX MTF 7000 SYN Transmission Oil is a customized product formulated with 100% high quality synthetic base stocks. It is designed to protect the oil against oxidation ensuring a stable viscosity. Detergents protect against bearing corrosion while dispersants and detergents ensure that critical parts stay clean and do not form harmful deposits. In addition, it is fortified with anti-wear and high temperature stability additives and antifoam to inhibit foaming of the oil. All of the above adds up to superior film strength and antiwear performance that translates into lower operating cost.

This product is recommended for heavy-duty manual transmissions and is compatible with seals, coatings, paints, plastic or metal parts and other materials commonly used in automotive and heavy duty fleet equipment and is miscible with mineral oil based lubricants.
