

Allied Premium Form Release 100 Oil

Description

Allied Premium Form Release 100 is a blend of specially selected base stocks and premium form release agents designed to meet the requirements of industrial concrete and general form release applications. It is a no-voc formulation containing no solvents or fuels.

Allied Premium Form Release 100 is suitable for use on steel, wood, aluminum, fiberglass, and plastic forms. It will not etch, retard, or soften concrete surfaces. Our product provides a clean release without the use of prying equipment and has no adverse effects on sealant, bonding agents, or secondary toppings on concrete. It can also inhibit corrosion on forms if a light coat is applied after stripping.

Application (continued)

Promotes easy stripping and reduces the formation of surface voids.

Typical Test Results

Properties	FR 100
Specific Gravity	.897
Viscosity @ 40° C (cSt)	9.0
Viscosity @ 100° F (SUS)	Calculated 58
Pour Point, C	-36
Flash Point COC, C	>127
Boiling Point, C	250
Color	0.5-1.5

Application

Allied Premium Form Release 100 is ready to use with no mixing required and can be applied by brush, roller or low-pressure sprayer. Forms should be clean and free from any contamination. Apply a thin even coat to forms, and avoid any pooling or puddling on form surfaces.

Allied Premium Form Release 100 Oil
